ABOUT

I am a Software Developer and a Graphic Designer, I am very passionate about bringing ideas to reality through Codes and Graphic designs.

For now, I build powerful, beautiful, and swift web applications that help businesses/brands keep potential customers and compete globally.

I am obsessed with technology and I plan on working with technologies like Artificial Intelligence, Virtual Reality, Augmented Reality, and Mixed Reality in the future.

I'm always open to new projects and freelance collaborations! So if you want us to work together, get in touch! I don't scratch!
